

The 2007 Hickory Motor Speedway Whelen Signature Trophy

This trophy will be awarded to the winner of the Late Model Stocks Feature event on Saturday, April 21st (Whelen Night at the Races!), our first 100-lap special event of the year.

The trophy was fabricated by Xtreme Trophies, of Hendersonville, NC, with the help of Whelen Engineering. It stands approximately 42" tall, and has a diamond-plate base with the NWAAS logo on a metal plate attached to the front of the base. The three bars in the trophy each contain a Whelen light-bar, with LED's that flash red, white, & blue. Two lights are also imbedded in the base, and light up and illuminate the NWAAS logo. The Whelen logo is also featured on the plaque attached to the top of the trophy. A motorcycle battery is installed in the base of the trophy, with a toggle switch to illuminate the lights.

A true collector's item and one trophy sure to bring the best drivers out to Hickory Motor Speedway on "Whelen Night at the Races!"

Many thanks to Whelen Engineering for their help on this trophy and their support of short-track racing, racers, and Hickory Motor Speedway.

While my pictures do not do it justice, we will have some professional shots taken next week.
